***Claim Rejections - 35 USC § 101***

1. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

2. Claims 4-13 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. In regard to claim 4, the claim claims a shaped product or structure formed of a coral of the species *Acropora grandis*, and is therefore positively claiming a living organism. The living matter of the present invention is not the result of human intervention; it is of nature, which has been held not patentable.

***Response to Arguments***

3. Applicant's arguments filed on 02/03/2003 have been fully considered but they are not persuasive. Applicant argues that the product of claim 4 is result of human intervention. Examiner agrees that the product of claim 4 is result of human intervention but disagree that the human intervention in claim 4 is enough to over come the 35 USC 101 rejection. For instant, if a surgeon merely removes a human organ from a donor to be transplant to a recipient, can he/she patent the organ by removing it from the donor? No, the surgeon will not receive a patent on the organ because he/she has not positively altered the organ enough to regard as a new invention. In the instant case, claim 4 with the limitation, "A shaped product or structure for medical or related purposes, wherein said product or structure is formed of a coral of the species *Acropora*

Art Unit: 3738

grandis," does not positively claim a product that was alter except for the fact that the coral was shaped during the harvesting of the organism.

***Conclusion***

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
